

INSTRUCTIONS TO AUTHORS

Papers for submission to the *West African Journal of Applied Ecology (WAJAE)* should be written in English and should not exceed 8,000 words in total length. Papers should not have been submitted or be considered for submission for publication elsewhere. Ideas expressed in papers that are published in the Journal are entirely those of the authors and not those of the Editors. Papers submitted will be subjected to peer review before possible publication. Authors are encouraged to suggest names of two potential referees. They should, however, not be from the same Institute, nor should they have been at any time closely associated professionally with the author(s) of the paper being submitted. The Editorial Board regards these names as suggestions only, and is not obliged to use any or both of the proposed names.

Papers for publication should be submitted to:

The Editor
editor-wajae@ug.edu.gh

Copyright

Authors publish in the Journal with the understanding that they assign their copyright to the West Africa Journal of Applied Ecology.

Organization of Manuscripts

Title page, indicating title, short running title, name of each author, and, for each author, position held and full address including the e-mail address. Please, indicate which address should be used for correspondence and reprints requests where there is more than one author.

Abstract This should not exceed 250 words. The abstract should provide a brief summary of the basic content of the paper, including major methods used, results and deductions or conclusions. Avoid abbreviations and do not include tables and diagrams, and, unless absolutely necessary, references should be excluded.

Introduction, to supply background information and references of earlier published reports related to the study, and provide the rationale for undertaking the study. Authors should avoid excessive references, particularly those not closely related to the study.

Materials and methods, to provide sufficient technical information on approaches, materials and equipment, etc., used to obtain the results reported, such that the work could be duplicated by someone else.

Results, This section should report only the findings, illustrated by Tables and Figures.

Discussion, an interpretation of the results, and its relation to other previously published work on the subject, and must not be a recapitulation of results.

Acknowledgement, Indicate the source of any financial support or personal assistance received in carrying out the study.

References, All citations and referencing should follow the APA style.

Follow the styles shown in the examples below:

Books

Give the name of the author (last name followed by a comma, then the initials), the year of publication in brackets followed by a full stop, the title, the city and publisher.

Single Author

Berger, P. (1967). *Religion as a sacred canopy*. London: Random House.

Multiple Authors

Dodds, J. H., & Roberts, L. W. (1985). *Experiments in plant tissue culture*. Cambridge: Cambridge University Press.

Edited Book

McDowell, L. & Sharp, J. P. (Eds.) (1999). *A feminist glossary of human geography*. New York, NY: Oxford University Press.

Book Chapter

When listing a chapter in a book, the editor(s) of the book should be presented by providing their initials followed by their last names, as in the example below:

Hammond, K. R., & Adelman, L. (1986). Science, values, and human judgment. In H. R. Arkes & K. R. Hammond (Eds.), *Judgement and decision making: An interdisciplinary reader* (pp. 127-143). Cambridge: Cambridge University Press.

Journal Article

When entering a journal article, include the

West African Journal of Applied Ecology

author(s), year of publication, the title of the article (using a sentence format, with no quotation marks), title of the journal (capitalizing the first letter of each major word in the title), volume number, issue number (if the journal has an issue number it should be followed by a colon): and the page numbers. The journal name should be written in full.

Holder, A. R. (1979). Women physicians and malpractice suits. *Journal of the American Medical Women's Association*, **34**:39-240.

Journal Article Accessed Online

Bayer, J. (2010). Customer segmentation in the telecommunications industry. *Journal of Database Marketing & Customer Strategy Management*, **17**: 247 – 256. doi: 10.1057/dbm.2010.21

An Article Accessed from a Website

Weatherson, B. & Egan, A. (n.d.). *Epistemic modals and epistemic modality*. Retrieved from <http://brian.weatherson.org/iemaem.pdf>
Note: If you think the internet source might change, include a retrieval date, as in the example below:

Weatherson, B. & Egan, A. (n.d.). *Epistemic modals and epistemic modality*. Retrieved December 15, 2012, from <http://brian.weatherson.org/iemaem.pdf>.

Illustrations and Tables, should be of high quality, and line drawing. They should be in a form suitable for reproduction without modification. Figures, photographs and tables should be added separately or inserted in the text. Lettering on axes and within figures should be clear and big enough to be legible even upon 50–75% reduction in

size.

The author's name, the figure number and indication of its proper orientation should be written lightly on the back of each figure. Photographs should be supplied as black-and-white, high contrast glossy prints. Colour plates may be inserted only if author agrees to pay for the expenses involved.

Units

All measures should be indicated in SI units. Where necessary they may be followed by the equivalent in traditional units in parenthesis.

Reviews of Books

Books and monographs will be reviewed by invited reviewers. They may be sent to the Editor.

Notes to Authors

Copyright material. Authors have the responsibility of ensuring that coauthors are in agreement with the form and submission of the manuscript, and for obtaining permission to quote material from copyright sources.

Authors are not expected to make extensive modifications of manuscripts at this stage, otherwise they would be surcharged. Proofs sent to authors for correction should be returned within three days of receipt, together with any order for reprints.

Acceptance of manuscripts for publication. Acceptance of a manuscript for publication will be communicated to the author, and whether any corrections or modifications are required to be made on the paper or not. Similarly, authors whose papers are rejected for publication will be notified.

Language

All manuscripts should be written in clear and concise language (using the British style). This will help editors and reviewers concentrate on the scientific content of papers and permit a rapid, smooth review process. Manuscripts that are accepted for publication will be checked by our copyeditors for consistency of spelling and WAJAE style.

WAJAE currently does not support copyediting for any manuscripts submitted for review with poor English. Manuscripts which are found to have English language issues will not be sent for review and will be withdrawn or rejected.

Ethical Responsibilities of Authors

WAJAE is committed to upholding the integrity of the scientific record. Authors should refrain from misrepresenting research results that could damage the trust in the journal and ultimately the entire scientific endeavour.

To do this, authors must ensure that:

- The manuscript has not been published previously (partly or in full), unless the new work concerns an expansion of previous work.
- No data have been fabricated or manipulated (including images) to support your conclusions
- No data, text, or theories by others are presented as if they were the authors own ("plagiarism"). Proper acknowledgements to other works must be given (this includes material that is closely copied (near verbatim), summarized and/or paraphrased), quotation marks are used for verbatim copying of material, and permissions are secured for material that is copyrighted.

Disclosure of Potential Conflict of Interests

Authors must disclose all relationships or interests that could influence or bias the work. Although an author may not feel there are conflicts, disclosure of relationships and interests affords a more transparent process, leading to an accurate and objective assessment of the work. Awareness of real or perceived conflicts of interests is a perspective to which the readers are entitled and is not meant to imply that a financial relationship with an organization that sponsored the research or compensation for consultancy work is inappropriate.

All inquiries as well as questions about content, context, or manuscript type should be addressed to the editorial office: editor-wajae@ug.edu.gh
